Resumen

Proactive Full-Stack Developer with **3+ years** of experience in building and scaling modern web applications. Expert in **JavaScript** and **TypeScript**, with hands-on expertise in **React, Next.js, and Node.js**. Proven ability to lead development teams and maintain high-quality **technical documentation (Swagger)** while ensuring seamless **QA and deployment workflows**.

Experience

Simplest.guru | Miami, FL
Front End Lead | 11/2023 - 01/2026

- Led the application redesign effort, guiding a group of **2 developers** through technical decision-making and implementation.
- Built scalable RESTful APIs with Node.js that handled data exchange for dashboard modules and system features for **85+ supermarkets across the US.**
- **Migrated** the company's **core system** structure to new technologies, significantly improving loading speeds and overall performance.
- Owned backend responsibilities including database **query optimization**, system maintenance, and resolving PM & sales tickets, ensuring high system availability and performance.
- Improved QA efficiency by providing comprehensive **documentation for every activity**, including visual evidence to facilitate thorough testing.
- Successfully implemented **WebSockets** to establish efficient, real-time communication between the client and server, dramatically enhancing user experience and data synchronization speed.
- Built a high-performance **React Native** application to synchronize physical inventory with Electronic Shelf Labels (ESL).
- Designed a unified scanning interface compatible with standard smartphones and industrial laser hardware, reducing pricing discrepancies in real-time.
- Managed development lifecycles using **Git** and **Jira** to track progress, resolve PM tickets, and ensure consistent project delivery under tight deadlines.

Sitrive | Maracaibo, Zulia
Front End Developer | 01/2025 - 03/2025

- Contributed to a tax ecosystem that automates document generation, calculations, and complex legal validations.
- Engineered a dynamic **Form Builder** that allows non-technical administrators to deploy complex collection forms, reducing manual programming costs.
- Utilized **Storybook** for component-driven development to ensure UI reusability and strict style guide compliance.

Projects

Full-Stack Inventory Management System

- Built and implemented a **modular system architecture,** ensuring scalability and clarity of operations.
- Structured and managed relational data in a **PostgreSQL** database.
- Integrated **invoice generation** for every sale, with dynamically calculated totals, taxes, and detailed product breakdowns.
- Developed a **statistics module** to provide insights into critical metrics such as top-performing products, stock levels, and sales trends.
- Utilized **Postman** to create and store collections for all API endpoints, facilitating testing and debugging.

Full-Stack Developer | QuickBooks & Payment Integration

- Developing a comprehensive front-end using **Next.js and TypeScript** to manage subscriptions, invoices, and payment flows via QuickBooks API.
- Architected a proactive alert system for at-risk accounts, streamlining debt recovery and financial data visualization.
- Contributing to the backend with **NestJS**, ensuring high-performing API interactions and secure data exchange.

AI-Powered Clinical Management System | Pleural Unit Specialist

- Designed an AI-driven hub to manage over 300 recurring patients, automating appointment scheduling and medical supply tracking.

- Implemented data-driven insights using **PostgreSQL and Node.js** to optimize resource management and healthcare delivery speed.

Education

Universidad Dr. Rafael Belloso Chacín | Maracaibo, Zulia
Bachelor's Degree in Informatics Engineering | 04/2026

Skills

React.js, Node.js, Next.js, Express.js, PostgresSQL, React Query, Docker, Vercel, CI/CD, Git, Github, Postman, Storybook, TailwindCSS, Linux, Mantine.dev, Google Cloud Platform, MongoDB, n8n, React Native, Typescript, Figma, WordPress

Languages

English, Spanish, French
